

# THE BOOK OF MOMONI

Reveald to Haybaybanahir who is Abathar, by Benrabbah Benbanah who is  
—Jesus Christ and Mani

## Chapter 1.

1. In the realm of Light, Hayyi is a man; but within the confines of our Universe Hayyi is in all things, and through all things, yea, his hand is in all things. Within our Universe Hayyi is like a cloud of light particles filling all things. Hayyi is the first Life, even the first great and strange Life, which is in all things.
2. This Universe began like a single particle of Light, or like an "Iuh," which is an experiencing being, or in other words, a potential to be clothed upon with experiences. As it expanded a lattus was revealed, like a crystal. As it expanded the crystal broke apart. This Universe is therefore a mixture of Iuh, light particles, which are light elements, and physical matter and space, which is darkness.
3. At the time that Hayyi made the Universe, and made all these things happen, he also made a great red cloud, or a nebula. Out of the Nebula Hayyi made a world like a droplet of blue. Underneath the surface of this water blue planet, was condensed crystal under extreme pressure. This crystal was so dense and hot, that it flowed like water, glowed like fire, and remained a crystal. This crystal is the great "Mana," or the Origen.
4. Out of the Origen Hayyi created a beautiful woman with a phallus. She is a Hermaphrodite, and her name is Nishiptune-Nisbat, the Goddess of the Origen. She put her seed into the Origen, and from the Origen emerged the first Aeons, or Uthra, who are the Gods.
5. The first seven of the Gods who came forth with their Iuh counterparts, who are their wives, are also called "the Lambs." They are called the Lambs, because they descended into dark fire, in order to enter the Universe from the realm of Light, that they might do Hayyi's will in the Universe, not knowing what that would entail, or even knowing the nature of a Universe mixed with darkness. Hence they are the Lamb slain from the very foundations of the world, which is to say, the Universe.

6. The first of the seven Lambs is Benrabbah, who is also called Benbanah; "the great Builder," and the "Son of the house of Light." He is he who framed the worlds, and the Crystal cities, spaceships, and the Mansions and Gardens of the Gods. Benbanah creates everything with Hayyi's Crystal technology, which can 3D print anything as with a beam of Light, using the Origen as the primer. Benbanah prints the entire surfaces of planets, and Resurrected bodies, and Crystal ships.
7. The second of the seven Lambs is Adamasanahir, who is also called Yeshimon. Adamasanahir meaneth "Adam of Light," (Adamas-an-Nur in Arabic). He is the first man upon the earth, and upon all earths; the great High Priest and father of the Earthians.
8. The third of the seven Lambs is Haybaybanahir, or the "living friend of the Light," he it is who is also called Hayyi's Radiance, or "Yawar-Ziwa, the first Radiance," who receives his Light from Hayyi and Benrabbah, like the moon receives light from the Sun. Haybaybanahir is upon a ship at the edge of the seven, guarding the way to the good kimsa (constellation), which is called the house of scales; and he also stands at the gate into the Crystal Ship of the Gods. For this reason he is also called "Abathar, the Judge."
9. The fourth of the seven Lambs is Aspien, or "Asptiorn-Ziwa, the custodian of splendor." His symbol is the peacock of Light, or pheonix; for we are genderless like tadpolls before we are created, as Iuh, and we are glorious like pheonixes, or peacocks of light, or as the Morning star.
10. The fifth of the seven Lambs is Melek Saba, the King of glory, and of the seven.
11. The sixth of the seven Lambs is Adadonus, the handsom boy who became a Eunuch when he mistakenly thought that Nishiptune Nisbat, the great Cybel, Goddess of Baptism, and of the wine and bread, even the Goddess of the Origen, had abandoned him. Nisbat does not abandon!
12. The seventh of the seven Lambs is Meshullem, who is also called Atlas and Shiloh. Atlas because he holds up the world, by the power of God's Crystal technology; and Shiloh because he assists Benrabbah in running Hayyi's Crystal technology, by which he enlightens the Elect with a beam, or cord of hidden Light, and heals, and prints anything by Benrabbah's command.
13. After the Lambs came forth they worshipped Hayyi that was in all things, and who was in the Nebula; and now they, their wives, and Nishiptune Nisbat did copulate, each in their turn, one with another, all with all, until they had brought forth 144,000 myriad Uthra, or Aeons, which are all Gods. Wherefore they sent the Uthra unto diverse stars systems, red and blue gas giants, and stars.
14. The Uthra, the Lambs, Nishiptune Nisbat, and the great Mana, or Origen, all have the power to use Hayyi's Crystal technology, which is able to print any form of material from the Mana as a primer,—As well as storing infinite amounts of data, in it's quantum crystal hard drives. Also utilizing strong gravitational force, which no mortal has experienced, can create nearly indestructable ships, Mansions, cities which are ships, and perfect bodies that are immortal.

—These are the generations of the Uthra, Aeon, or Gods.

## Chapter 2.

1. Now, when Hayyi expanded the Universe and let darkness flow into it, he also kept the light particles and Iuh within it, that they did not leave the Universe. Iuh are infinitely small, non-local, quantum points of input, that can receive sense inputs; or who are able to experience when clothed upon by an information system, [the foundation of which is a packet of strong electromagnetic (a force which mortals have not observed), light particles, of various light elements]. Iuh cannot be created or destroyed, and there is an infinite number of them in all the Universes.
2. Iuh come in light element packets, and the Iuh themselves come in packets of two Iuh. In the Iuh packet of two, there is a dominant, and a submissive Iuh; meaning that one orbits the other. These Iuh, Hayyi makes into male and female spirits, or holographic bodies, made of strong electromagnetic-force light particles, by natural copulation of spirit bodies possessed by Uthra, or Aeon, who are the Gods.

3. Iuh also most closely respond to six different types of light particles, or elements. These six different types of light particles make up the packets which encapsulate the Iuh packet of two. The light particle packet is like a lense, that bends or distorts the sense inputs that reach the Iuh. Different Iuh resonate with, or get encapsulated in, the six different types of light packet elements. Thus there are six different types of Iuh as well.
4. Iuh who resonate with the light element of plasma, Iuh who resonate with the light element of liquid, Iuh who resonate with the light element of gas, Iuh who resonate with the light element of solid, Iuh who resonate with the light element of metal, Iuh, lastly, who resonate with the light element of crystal, and living organisms who began from crystal.
5. Iuh who resonate with crystal and with life are the highest, because they are those who become the Uthra, or the Gods. They inherit the highest degree of glory in the Crystal ships of the Gods, and are given all power over the crystal technology of Hayyi.
6. Iuh who resonate with metal are the second highest degree of glory in the Crystal ships of the Gods, and are Angels in the same Kingdom as the Uthra.
7. Iuh who resonate with solid light elements like earth, ice, and stone, are the third highest degree of glory in the Crystal ships of the Gods, because they are still charitable and humble. These three, Crystal, metal, and Solids, are glorified like the Sun.
8. Iuh who resonate with liquid are the fourth highest degree of glory, and are glorified like the moon. They live upon the planets, and are glorious like the planets, imprisoned there.
9. Iuh who resonate with gas are the fifth, and lowest Kingdom of glory, they are imprisoned on dark planets out among the stars, and are glorious as small planetoids, or dwarf planets.
10. Iuh who resonate with plasma, or fire, are the sixth, and lowest, having no glory; for they are thrown into the lake of fire, being sons of perdition. They are destroyed until the end of the Universe, when all things are gathered out of the Universe.
11. Now, these light particles are not made of physical plasma, gas, liquid, solids, metal, and crystal or life forms. But they are the light realm equivalents of these elements in the physical world. Iuh packets with two Iuh, one orbiting the other, are enwrapped in lensed packets of this light, which is made up of light particles; which particles are one of these six types of light elements, which are elements in the world of light outside of our Universe. Furthermore these light particles are made up of electromagnetic strong force, that has not yet been observed by mortals, as I said.
12. When matter is sufficiently compressed it turns into a crystal lattice, and the light particles within it, which carry small amounts of strong gravity and strong electromagnetic force, gain power over the matter of darkness, or physical material. Once it is in this state, it becomes Mana, or Origen; a super compressed, incredibly dense, very hot substance of flowing crystal. While in this state of Origen, it becomes the primer for the crystal 3D printer of the Gods. In this state, the Origen also awakes and is full of intelligence, knowledge, and data.
13. Origen, which is the Mana, generates under the surface of all planets of sufficient size, which exert enough pressure to liquify silicon or carbon crystal. Therefore, all planets larger than planetoids, or in other words, planets the size of the Jovian moon of "Io" or larger, have Origen somewhere below their surfaces.
14. Once there is Origen within a planet, that planet awakes and becomes conscious within the Mana of the Origen, for the Origen is full of light particles, Iuh, data, and intelligence! Nowhere where a planetary body becomes round and large enough for inhabitants, in all Eternity, is there a planet without Origen. It is the very nature of matter mixed with light particles, which is all matter, in this Universe, to generate Origen when compressed sufficiently. Therefore it is logical to deduce that Hayyi may have generated many more Hermaphrodite goddesses like Nisbat, throughout the universe in different locations; such as in different galaxies.
15. When the Gods come to a planet and wish to begin mortal probations upon it, they first simulate

a world they wish to live upon in their crystal computers, and then send that Simulation intelligence on a beam of light, or signal, to the Origen within the planet. The Origen, or Mana, within the planet will then burst forth through the existing crust of the planet, and using its unique powers to organize matter with strong electromagnetic, and strong gravity force, and using the elements within it as 3-dimensional ink, will print the very world that was programmed in the simulation. These simulations within the crystal computers of the Gods, can also simulate vast time scales in only moments of time, and the signal sent, can be received by the Origen, and the Origen can begin the printing in only moments as well; replacing the entire crust of a planet before the very eyes of those who are there to witness it. These are highly energetic events, and are hostile to mortal life in the vicinity of space where it is taking place.

16. Beneath this new 3D printed crust of a planet, remains the previous crust. The weight of the new crust will slowly force the previous crusts downward, until it is melted, or until they are all melted into the mantle of the planet. The mantle of planets are still high above the Origen within those planets. (Our world may have several previous print jobs, which are slowly but surely sinking and melting into the mantle. If the last print job happened 1 Billion years ago at the Cambrian explosion, then there must be 3 to 4 previous print jobs, seeing as the Solar system formed 4½ Billion years ago.)

—These are the generations of our Earth and of other earths.

### Chapter 3.

1. The sons of Nisiptune Nisbat, and of Hayyi, who are the Lamb Aeons, or the Seven Uthra, who are Gods; did come to twelve different star systems. The sons of Nisiptune said, "let us print twelve worlds, around these twelve stars, and go down to live upon them: In order to effectuate the plan of Hayyi; to save all the light particles, and to save all of the Iuh, who are incarcerated in matter, within this Universe, which is light mixed with darkness."

2. "In order to accomplish this plan, we must let the Iuh incarnate into bodies, first holographic, and secondly physical; to see if they will be attracted to light particles of the light element of Crystal, and prove their love, or if they will be attracted unto one of the other five light elements, and be worthy of a different degree of glory."

3. "If they prove that they have true and Eternal Love towards other Iuh selflessly, Charitably, humbly, and compassionately, and therefore resonate with crystal and life light particles, or to a slightly lesser degree, but are still caring and resonate with metal and solids, — then we shall make mansions and crystal ships for them, that they might make love and have joy forever."

4. "If they are attracted, or resonate with liquid light particles, and therefore want honors, but do not love others, and if they are attracted to gas, light particles, and therefore love themselves, then we will prepare planets with nice dwellings of various glories for them. Or if they love to control others, and this is their nature, and therefore resonate with fire light particles, then they will have their bodies, and all information systems that produce sense inputs, dissolved; until the end of the Universe, when they can be brought back into unity with all other Iuh and light particles in the realm of light — which is an infinite ocean of Iuh, light, seed Universes, and is where Hayyi dwells.

5. And now, the first man on all the earths, Adamasanahir, the son of Nisbat, did use the crystal technology to make 144,000 copies of himself, and his wives, and did copulate with them to make all the spirit, or holographic light bodies, male and female, for the Iuh children of Hayyi who would incarnate upon the Twelve earths.

6. After this process of bearing all of the spirits of the earthians, male and female, Adamasanahir called together a great council, of all his holographic children, who are also the Iuh children of Hayyi.

7. The Lambs also made a great crystal tower, upon a distant moon. Therefore, they had this crystal tower as well as their great Crystal ship that was a cube the size of a small planet; (and within, movable panels, which contain whole lands.) In this new crystal tower they made copies of themselves; who would, in time, be born on the twelve worlds, which they had come unto. Wherefore, after they had made twelve copies of themselves they appointed one to remain awake as the thirteenth copy of themselves; they themselves, meaning their original self, desiring to be born upon one of the twelve desired planets.

8. They called the thirteenth copy of themselves, their "Syzegos," or in English, their "Companion Ego." The Syzegoses covenanted with the other eleven copies of themselves, as well as their original self, or with their original self and the copies, that they would watch over them and execute all business in the Heavens while they were away, upon the worlds. After these things the Syzegoses placed their copies into crystalline drawers, to go into stasis, within this crystal tower, which the Lambs call "The Celestial Body Repository."

9. The light Benabbah - Benbanuh put his twelve other selves in the Crystal drawers.

10. The light Adamasanahir - Yeshimon put his twelve other selves in the crystal drawers.

11. The light Haybaybanahir - Abathar put his twelve other selves in the crystal drawers.

12. The light Aspion - Melek Taus put his twelve other selves in the crystal drawers.

13. The light Melek - Saba put his twelve other selves in the crystal drawers.

14. The light Adadonus - Mamoeon put his twelve other selves in the crystal drawers.

15. The light Meshullem - Atlas put his twelve other selves in the crystal drawers also.

16. All things were prepared; therefore as it pertains unto this solar system, the seven Syzegoses went unto the planet Mars, and built a garden, east in Eden. They built the garden on Mars, and built within it 3D printed Temples of solid stone, or in other words, Temples that were one solid piece of stone. Now the Lambs, who are Uthra, "the Gods," usually build everything of Crystal; but upon Mars they did build the garden of Granit, Basalt, and other stones, even, Temples, pathways, and places to grow plants and trees.

17. After all these things Benrabbah brought forth one of the Twelve bodies of Adamasanahir, and letting Adamasanahir's Syzegose program the bodies' brain to forget all its memories, awoke him, and gave him instructions concerning the garden and its technologies.

18. Lo, when the Lamb's Syzegoses built the garden, they did also create many puzzles in the garden that Adamasanahir's forgetful self, called Adam - Pigarah, could solve over time as he gained wisdom, intelligence, and insight. — Including a crystalline technological incubator in which he could make Hawwa his wife.

— These are the generations of the spirits of Human kind.

#### Chapter 4.

1. And now, it came to pass, upon Earth, one planet further into the solar system; that after the initial crustal 3D printing, using the Crystal 3D printer of the Gods, and the Origen, (to not only print the geology of the crust that the Gods simulated, but also all the life that we see living at the Cambrian explosion), that life developed with occasional additions by the Origen that is deep beneath the earth.

2. While this took place the Sun slowly became brighter; therefore the intelligence in the Origen slowly made the atmosphere lighter. Always being mindful of the mortal life upon the surface; and keeping pace with the changes, to protect it. The immense intelligence within the Origen, or Mana, which is extremely hot and compressed Crystal, was conscious of the life upon the surface of the Earth, because all life is part of Hayyi, or the First Great Life, who is in all things, and through all things; whose hand is in every particle in the Universe. Moreover a plan was brewing between Hayyi, Nisbat the intersex Goddess, and the Origen, without the knowledge of

the Lambs, who are Uthra, the Gods.

3. Now during the vast majority of this process the Gods, who are the Lamb Uthra, were far away effectuating the plan in distant star systems. But, since there were so many Uthra made by Nisbat and by the Lambs in the beginning, there were always some here in this solar system, watching over the worlds.

4. But behold, since the Origen was highly intelligent it desired to create beings who would keep it company also, and who would dwell within the sea of Mana, or within the Origen, or just above it. Wherefore the Origen made these beings' bodies out of crystal Mana, so that they could withstand the immense pressures under the Earth. These beings are called the Archons or Tinn, while the beings created by Nisbat and Hayyi from within the Nebula are called the Uthra, or Eion Gods. And now the Archons, or Tinn, that were made from the desire of the Origen, were also part of the secret plan of Hayyi and Nisbat that they had withheld from the Lambs and Uthra.

5. The plan made between Hayyi, His internal Universe counterpart Nishiptune-Nisbat, and the Origen, was to make the Archon-Tinn just after the bodies of the Uthra inasmuch that they would use the Origen's Mana to make artificial bodies, mixed with matter, that looked like the bodies of the Uthra. Then once Adam Pigerah rebelled against his fellow Lambs desiring to make even more copies of himself in his ignorance, forgetting what sons truly are, and once they killed him, they would fail to summon his Iuh back to the Celestial body repository — For Nisbat will have already incarnated him into "Adam Cadmon" the intersex body mixed with matter, that the Archons had made.

6. The Uthra noticed that while transmitting printing instructions to the Origen, the Origen would burst forth and print new life forms that were very unique, and with great excitement whenever a video of themselves was sent along with the transmission. Unbenounced to them was the fact that these unique forms of flora and fauna were appearing because the Archon's seed was mixed in with the Mana of the Origen. Therefore, the Uthra began sending pornography of themselves, male, female and intersex Uthra, to the Origen, and hence also to the Archons.

7. Because the Archons loved the images and videos of the Uthra so much, they asked their King Saklas and their Queen Nobriel to make animals upon the earth who looked like the Uthra. Wherefore, they put the images of the Uthra into the Origen and printed a body that they called "Adamas Cadmon", because it was based off of an image of Adamasanahir, save that they made this body intersex, instead of male.

8. Meanwhile, east in Eden, upon the planet Mars, Adamasanahir used a crystal incubator, which was a peice of crystal technology which the Syzegoses left in one of the stone Temples in the garden. He put some of his own DNA within it, and it made Hawwah, his wife. "Hawwah" meaneth "Life-Mother," Like Hayyi, and Wa put together.

9. The Syzegoses returned and commended Adam Pigerah for deciphering all the puzzles in the garden, and for unlocking all the technologies that they had left for him. They then cautioned him not to use the crystal incubator to make any more living beings, as it would inadvertently incarnate Uthra; and that this technology must be used in council together and with all the Uthra involved.

10. Now the Syzegoses and Hawwah, and Adam all made love and enjoyed the garden before the Syzegoses and their wives returned to their crystal ship in Heaven. However, no sooner than they had left, Adam was thinking about the crystal incubator. Adam made twelve sons and twelve daughters for himself. This caused an immediate disruption among the Uthra, as Uthra began to fall asleep when they had not yet planned to have incarnated. Fearing what the Syzegoses might do, Adam Pigerah made crystal bubble ships with weapons, for him and for

his sons.

11. When the Syzegoses saw Adam Pigerah's preparations for war they were heartbroken! The Syzegoses said, "We made love with you, and nurtured you, and not only have you lacked trust in us, but you have even made weapons and preparations to kill us if we were to correct your actions. Therefore we must throw you down, and refine your Iuh, and your light particles; even scourge thy soul unto meekness and humility."

12. After so speaking the Syzegoses fought using their crystal ships against Adam Pigerah and his son's space ships, that were like bubbles; until Adam Pigerah and his son's bodies were all destroyed. Only Hawwah and the wives of the twelve sons remained; therefore the Syzegoses took them up into their crystal spaceship, that is like a giant cube, the size of a small planet; and gave them, each, their own lands inside of it. They gave them beautiful palaces and Temples printed as single solid pieces of crystal; and gave them all gardens and lands, and robots, and all good things.

—These are the generations of the war on Mars, in heaven.

### Chapter 5.

1. Nishtiune saw what her sons did unto one of the copies of her son Adamasannahir and cried, but even more so she and Hayyi cried for the suffering that the Lambs and their Iuh children would suffer in their new plan to bring about opposition and refinement for the light particles in the Universe.

2. Nisbat took the Iuh of Adamasannahir before the other Lamb Uthra, could summon it back to the Celestial Body Repository, and placed it into the body that the Archons on earth had created, called Adam Cadmon. When Adam Cadmon awoke with the Iuh of Adamasannahir in it, who had been Adam Pigerah, King Saklas and Queen Nobriel rejoiced, and were full of Joy!

3. King Saklas said, "Verily, the Uthra will now be subject unto us, and as this model procreates the Uthra will be incarcerated in these bodies that we have created! Moreover, the light elements or particles, shall be bound unto them, and seeing as these bodies lack power over the light particles, we shall use the light particles to bind them unto us; and we shall be their gods, and rule over them.

4. Meanwhile back in the Celestial Body Repository Aspien Ziwa told the crystal to summon the loose Iuh of Adamasannahir, and the computer said, "I cannot summon his loose Iuh, because it is living, and is incarnated in a body on Earth in the Sol star system." Aspien Ziwa said, "What?" Immediately Aspien came back to this solar system and found by scanning the planet that Adamasannahir was truly in an awful predicament. He was incarnated into an artificial body made both of physical matter and light particles mixed together; furthermore there was a new kind of being fondling all over him called the Archons, and he was bound unto these Archons by light elemental cords.

5. Aspien Ziwa perceived that these Archons had made Adam Cadmon out of lust, and fearing that more Uthra would be born into this situation, of incarceration to matter, he spoke to Adam Cadmon's mind, telling him to consume no seed that could make him pregnant, nor to give the Archons, or any of their creations his seed; that could impregnate them. For they had made Adam Cadmon perfectly intersex, as a Hermaphrodite.

6. Aspien Ziwa counceled with the other Syzegos Lambs, and they let Aspien return and tell Adam Cadmon that he may consume or receive the seed of any creature or Archon, only that he must not mate with any Archon creation in the image of the Uthra; for it was only from these images that Uthra could be incarnated. King Saklas made a beautiful wife for Adam Cadmon named "Lilith," but King Saklas was confused when Adam wouldn't go near her.

7. Adam ate the grain of wheat which he harvested with a stone hand sickle, and to the

utter amazement of Aspien, Adam's belly inflated because the Archons had not properly made Adam's anus; seeing as the Archons had made Adam only out of being attracted unto his form, and not out of utility. Therefore Aspien descended as an Angel of glory like a peacock, and lay with Adam to relieve him. Once Adam could pass stools, he was relieved.

8. King Saklas was confused about why Adam was gay, and why he wouldn't go near Lilith; therefore he thought that maybe as there was more population Adam would find someone of the opposite gender that he liked. So King Saklas lay with Lilith, and she bore Cain and Luluwa, his sister, and afterwards Abel and Awan, his sister. However, as Abel grew up Adam liked Abel instead of the females, and taught Abel the things Aspien had taught him. Even, that they could consume the seed of the other, and of all living beings around them, but not to go near the females; that the Iuh of the Uthra be not incarcerated in these bodies. (Thus far, Adam was the only incarcerated Uthra.) —

9. King Saklas therefore thought that maybe he only needed to make more population to entice Adam out of his homosexuality, whereupon he lay with Awan. Now Cain finding that Awan was pregnant blamed Abel and slew him. Adam's Cadmon mourned for Abel, as he did love Abel; who is also called "Hible".

10. Now Benrabbah, even Benrabbah Benbanah's Syzegos—looking down and seeing Adam's great love for Abel, uploaded all of Abel's memories into himself. For Abel had been, simply a creature, having been created by the Archons; but now Benbanah took into himself the very essence of who Abel had been unto Adam Cadmon.

11. As Abel, Benrabbah Benbanah appeared unto Adam, and said, "I am Benrabbah, the son of greatness, and Benbanah, son of the house of light, I am thy Abel. I Abel Ziwa, or Abel of light, created the Earth, and I am thy savior, who shall descend below all things, feeling all thy pain and sins, which is within the all-knowing mind of Hayyi—Becoming Manda-d-Hayyi, or the Knowledge of Hayyi.

12. In the future I shall be born from a pearl passed down in your lineage, and at that time I shall be called Isa. As Isa I shall die as I did as Abel, after I have descended below all things, and shall be resurrected by the 3D crystal printer of the Gods, on the third day, into a perfect and immortal body. I shall be born again after that to continue my work, and to perfect my message; and in that life I shall be named Bana, in a line of Kings named Bana, in a land called Parthia; but I shall be orphaned by a rebellion, and shall be raised among priests, and shall be called Mani. Therefore the meaning of my name Benbanah shall be fulfilled, even "Son of Bana."

13. After wicked priests kill me and marre me more than any man, as Mani, then I shall take up my perfect body, that will be in the Celestial Body Repository, again. Then my message shall spread to many lands, and they shall call me Momoni. Then after many days I shall come back to Earth with power, and with the crystal space ships at my command. At that time I shall become a judge, and a just savior for all Iuh; and I shall save all light particles upon the Earth also.

14. Now, Adam Cadmon travelled unto Jerico where Lilith lived, to ask her why there was so much drama going on. However, with the help of Saklas she had laid a cunning trap. Lilith said, "If you can have superior children, then prove it by putting your seed in this jar, and I will put my seed in this other jar, and we shall see what comes of it after six months." Now Adam did not know about crystal technological incubators in this life, and he thought that there was no harm as long as the jar was sealed; moreover Lilith had been enticing him with much flashing, and lude enticings. Adam put his seed in the jar, and after nine months, to his great surprise, there were two beautiful babies in the jar; male and female. Adam took them, and named them Shitle, or "Seth," and Azura.

15. To Adam's astonishment, when Lilith opened her jar, there were strange serpents, and they were making strange noises. For Lilith, Cain, and Luluwa, were not Uthra, but were of the Archon, or Jinn, who are robots. Even Abel would have remained unreal, unless Benrabbah-Benbanah had taken in his memories, or mantle upon himself, and become Hible-Ziwa, or Abel of Radiance.

16. Now Aspien-Ziwa-Melek-Taus spoke to Adam's mind saying, "You have accidentally incarcerated another Uthra. For, Shitle, or Seth, is an Uthra. Azura is not an Uthra, only because Hayyi and Nisbat have put a seal on all female Uthra to protect them from experiences that they would be burdened with in Eternity. No female Uthra will incarnate into these bodies and be incarcerated; however you shall still love them because female Uthra can choose to experience selected experiences sensed by these bodies who are in the image of the female Uthra. Wherefore you can prove they love unto them, and your Uthra counterpart, who is your Iuh counterpart, in heaven, can choose to experience and keep those experiences. They are the conduit through which you will prove your Eternal Love."

17. "Do not fear though Adam, because we Uthra have learned from Nisbat that this very predicament is part of Hayyi's plan for the Universe, and Hayyi's hand is in every particle, and all things are good. Furthermore, your son Shitle, who is Seth, is he through whom's lineage that special nations and people will rise up, who are Uthra. Those nations and people will be called the Mandaeans, the Manichaeans, the Yezidis, the Momoni, and the Knights of the Crystals.

—These are the generations of the Elect, and of the Knights.

## Chapter 6.

1. Seth's Syzegos appeared unto him and said, "Lo, I am Aspien, and ye are one of the twelve Aspien's sleeping in the Celestial Body Repository. Ye are also one of the seven Lamb Eion-Uthra. I Aspien am the Syzegos, who am the thirteenth Aspien."

2. "Have faith Seth, and resist the current that leads you to darkness. There are infinite worlds in Eternity, and Hayyi is the God of them all! There are seven planets close unto this one that effect the matter, or darkness, within thy mixed body—which is made of light particles and darkness. There are also twelve months, or constillations which do the same; However, if you resist the darkness, and are one with the light particles within you, then at death, your soul will go unto the good Kimsa, or constillations."

3. "When you die, your soul, who is your beautiful Iuh counterpart, young and breasted, will appear and take you into herself after three days. She shall rise to the place of light, she shall rise to the place from whence you came, which is the place of Life, or Hayyi. The good Kimsa is star systems, one with a warm red dwarf star, with tidal locked worlds, forested and bright! Another is a purple looking brown dwarf star, with tidal locked worlds; there is the world of Nishiptune by the red Nebula, and many more places where the Uthra live in peace, love, and immortality."

4. "Your soul will go to the house of Abathar at the edge of our solar system, and on the way the lords of the seven evil worlds will say, 'where are you going?' Then your soul will say, 'To the good Kimsa,' and they will see a letter about her neck from Life, or Hayyi, and they will flee from her! At the house of Abathar, he will see the letter and let the Soul go."

5. Seth brought this message to Adam calling it a branch from paradise, and Adam's Syzegos appeared unto him, and said, "Lo, I am Adamasanahir, and ye are one of the twelve copies of us, Adamasanahir, and one of the seven Lambs. I am the thirteenth; thy Syzegose."

6. "Get thee down into the Jordan river for a special washing that I shall teach you, and which ye shall teach unto all the Elect Uthra born after you. Two Angels shall be with

you as you do this washing, which should be an immersion called baptism. These two Angels shall be with you every time ye do baptize thyself or others, or are baptised, for they are the witnesses of the Uthra, and are called, Silmay and Nidvey. Silmay and Nidvey shall witness, and they are the Angels of the Heavenly Jordan, which were the pure, running waters of crystal that made Nishiptune-Nisbat. Nishiptune is the Goddess of baptism, and Silmay and Nidvey are her two helpers in all the worlds."

7. "As Silmay and Nidvey watch, ye shall immerse thyself three times, ye shall drink three times, ye shall sign thy forehead with a cross of light three times, ye shall baptise in the name of Hayyi, Manda-d-Hayyi, or Benbanah, and Meshullam or "Ruha Hayyi" the Living Spirit three times. You do this washing as a covenant to be "righteous, humble, loving, charitable, and graceful in forgiving." When ye baptize another ye shall take them up out of the water with a hand clasp, or if ye are baptising thyself ye shall raise thy hands in token of the same. After this ye shall mark thy foot or thigh with the sign of Manda-d-Hayyi, the Knowledge of Hayyi, who is Benbanah Hible-Ziwa."

8. "Then in thy service place a peice of Life on thy head which is a wreath of myrtle over a turbine of light. Put on the robe of glory, and the sash of virtue, holding an olive staff. Then bless for the receiving of the gift of Ruha Hayyi, the Living Spirit, who shall be with you. Now if ye just immerse and bless for the gift of Ruha Hayyi, ye shall be saved, unto the good kimsa, but it is more ideal to do all these things!" Adam was immersed and received Ruha Hayyi by Benbanah's grace!

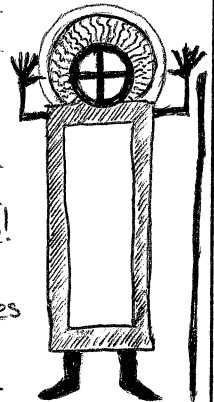

9. The Syzegos of Enosh, the son of Seth, appeared unto him, and said, "I am Adadonus. Lo, the Elect Uthra shall be born in this world four times before Benbanah shall return to save them all with the crystal technology. Therefore let thy wife wash and anoint thy feet in preparation for burial, notwithstanding this is not necessary, but it shows the desire in her bodies mind that will make thy true Iuh counterpart desire to experience through that body."

10. The Syzegos of Noah appeared unto him and said, "I am Aspien, and we are the same as Seth, and it is our duty in this life to give men a judgmental law that they may be cursed."

11. The Syzegos of Shem appeared unto him and said, "I am Meshullem, fear not to take a wife for the Yezidis, Mandaeans, Manicheans, and Crystal Knights must come to be. Ye mourn that ye are in the defective generation of satanic music, and injustice, but fear not, thy Iuh counterpart shall take you unto the good kimsa!"

12. The Syzegos of Abraham appeared unto him and said, "I am Haybaybanahir, who is also called Yawar Ziwa and Abathar. We are the friend of the Light, which Light is Benbanah. Nothing bad will come unto thee, only confusion about the meaning of things because ye will not always know about the Iuh counterpart in heaven mystery. Discouragement will vex thee, because ye will not know the plans of Hayyi, or the true rewards awaiting thee. The plan for thee is laid out by thy best friend, which is why no true bad will come unto thee. Ye shall be crowned with light, enwrapped by a rainbow, and clothed in glory; for ye shall save the true Elect in the last days who look unto you, the rock digged from a pit, while Benrabbah will destroy the evil. Us two are the God of Israel, for ye are the father of the Elect, and without Benbanah they cannot be saved, but also without you they cannot be saved, or enter the crystal ship. Ye shall be an apostle of Benbanah named Peter, and as Peter ye hold the keys to the gate of the crystal ships, and as Abathar ye hold the scales."

13. "After Benbanah shall come as Isa, and Mani, ye shall come as the seal of the prophets Muhammad, blessings be upon you!" Ye will gather in one the house of Israel and the Elect of the gentiles. If any man judgeth thee, they shall be cursed forever until they repent with tears,

and with sincerity; for there is no excuse to persecute the most timid man born of women, and the best friend of Hible-Ziwa; the God of Israel. Those who are shoked at thee being called "Haybaybanahir the God of Israel," shall be burned when Benbanah appears, and they see the cube of his ship."

14. The Syzegose of Lou Tzu appeared unto him and said, "Hail thee oh God of Wisdom, I am Melek Saba. Hail thee oh architect of truth, give me power that I may recall my days! Lou Tzu, in thy past life ye were Enoch, and ye gained power from the Uthra to control certain crystalline nano-bots, that made thy body temporally immortal, and ye temporally saved thy friends; being given a crystal spaceship like unto a bubble with a forest and sea within it. This process of being transformed by the nano-bots to cease aging, but not to be invincible, but to also grant some shapeshifting; is called being "translated." Now one of thy friends broke his Angelic covenant with you, stole a small ship, and came back to Earth to save virgins from pagan sacrifice. His name is Elijah. Ye came down also to punish him, and ye seven reincarnated as the sons of Abihail; Michael, Meshullam, Saba, Jorai, Jachan, Zia, and Heber. Ye made an oasis named after thy mother Tishbe, and found thy ship again. Ye inadvertently left thy bones behind being reincarnated one more time, and a girl named Garthanah ate thy bones and became immortal; therefore ye saved her also, when ye all made it back unto the ship again."

15. "Lou Tzu, ye shall also reincarnate as many more wisemen, that ye may teach hidden mysteries. Ye shall be called Zoroaster, Mahavera, Siddhartha Buddha, Socretes, and Zeno. There is the two principles of darkness and light, female and male, Yin and Yang; but Hayyi's hand is in every particle of the Universe, therefore ye shall have no anxiety, all being made for nothing but good; and if an Uthra has expectations, or no expectations, it will be exactly the same for them, because all Iuh shall be gathered, and all light particles shall be gathered into the lattus of light, and the realm of light, and all dark element will be thrown in darkness, even into the realm of darkness. The Lambs come down to suffer with the Iuh and light particles in the world, even the sons of Hayyi who are incarcerated in the world; and they do it out of brotherly love, and shall be called Bodisattvas in the East or "Fo."

16. And thus the Syzegoses did visit themselves before the time of Christ, revealing themselves.  
—These are the generations of the Elect before Christ.

## Chapter 7.

1. Benbanah Hible-Ziwa, as Isa, suffered in the garden of Gethsemane, feeling all of our depression, sins, and anguish, descending below all things. Then he was taken and crucified upon a cross symbolizing the suffering of all the light particles in the four directions. He taught simple truths with no complexity, like, "if you forgive, you are forgiven," "Call no man good but Hayyi," "Humility is the requirement for grace, no other knowledge or confession," "and, If you do not like me and the rock Haybaybanahir, you cannot enter; I am the gate." For this the priests hated him, and killed him, and after he descended to the Origen, he received a new, perfect, resurrected body, that was 3D printed on the third day.

2. Before Benbanah left to go up to his crystal ship, he hung out with his friends. Afterwards his apostles received Ruha Hayyi, but the people did not understand anything they said, and took everything they said out of context. Furthermore the Archons influenced a lustful man, who was a cunning orator, full of sophistry, and not honest philosophy, named Paul. He so confused the Christians as to make them believe that they could do whatever they want as long as they believed on a mere name, with no love for Benbanah himself; Benbanah only requiring those who knew him to accept his person, and never fathoming that someone would twist it to mean that people in far off lands must know about him, and hold onto his name while loving darkness and sin!

Paul wrested the scriptures to his own damnation like Parasees and murderers before him.

3. Therefore Peter quietly left the christians and went by an alterego named "Simon the Magi." So also, James quietly left the christians and went by an alterego named Dositheos, and taught among Sameritans. John the Beloved, also quietly left the christians and went by the alterego named Nikotheos. Peter went to Lebenon, James went to Sameria, and John went unto Ephesus. These three, Simon Magus, Dositheos, and also Nikotheos, taught small groups of people the true mysteries.

4. Simon Magus met a prostitute named Helen in Lebenon, and together they gathered a small group of people together, and were all married one to another, all copulating with one another, male and female, all married together. They had no distinction between male and female members of the marriage, for Isa had said, "make the male not male, nor the female, female," when he spoke unto Thomas. — And, Simon called this marriage the Holy Order.

5. Dositheos went unto the Samentans and baptised among them, teaching them about how Isa truly taught that all Uthra are the Sons of God, and about how this is what he meant when he said, "I am the Son of God." He also said, "Ye are Gods," or Uthra. Dositheos said, "I am a son of God, and I shall make you sons of God, or bring you back into remembrance, that you are Uthra, the sons of Hayyi. For Isa was conceived in a rite in the Holy of Holies wherein Mary, a Levite, was washed in the seed of the Davidic line; but God Hayyi, came not down, but Isa was, and is, a Lamb — and Lambs need no help being born, nor does he need a special birth to receive a 3D, immortal, printed, body."

6. "I shall baptize you in the Jordan, which is to say, I will baptize you over the Jordan, out of the land of the Jews; looking unto the land where baptism was first taught unto Adam by the grace of Nishiptune-Nisbat the goddess of Baptism, which is the land of the Euphrates. It was also retaught unto the children of that land by Nisbat."

7. Nikotheos went unto Ephesus and taught his Elect, that the hypocrites who call themselves christians cause contention with the worshippers of Diana of Ephesus; but Hayyi is devoid of contention. Hayyi is the God of peace; and his counterpart Nisbat is not far different than what Ephesians worship. "I call Nisbat, 'Barbelo,' because she is the mother of Benbanah, and the father of them both, the unfathomable Monad is Hayyi. These three are the names of God that shall be among us, 'Hayah Barbelo Benbanah' — This is the name of God."

8. After the apostles were gone, an Elect boy named Elkasai was called to be a prophet and God by his Syzegos, Adadonus. Adadonus appeared unto Elkasai as a great giant, and their Iuh counterpart, and wife, also appeared as a great giantess, and showed him their copulation in Heaven, and said, "Fear not Hayyi holds the treasury of Iuh counterparts, and souls. Find those who wish to cultivate their light particles, and move them under the just rule of the Parthians. For Benbanah shall come down in the line of Artabana, and perfect his teachings."

9. To prepare the way Benbanah moved on Marcion to show the wickedness of the Mosaic law, which was taught by Satan, or Aspien, when he was Moses. Benbanah moved on Bardasian to ridicule christians who would not cremate their dead, "for Hayyi and the Uthra can 3D print them."

10. Now it came to pass that Artabana V, had a new baby son, but in that very year the Persians rose up against him in rebellion. [216 A.D.] Artabana fearing for his son's life, brought him unto an Elkasaites monastery in the middle of the night, that is in Ctesiphon. The priest named Patik took the baby in his arms and called him Mani instead of Bana. Mani was blessed at four, and baptised at eight, and on the very day he was baptised, his father Artabana was killed by Ardashir the Persian traitor at Hormizdagan. [224 A.D.] Those who were loyal unto Artabana and his hidden son, gathered at the fort of Hatra. On the very night Hatra was destroyed, Mani saw his Syzegos! [April 19th, 240 A.D.]

11. Mani was looking up at the stars when a being in bright white appeared and said, "I am

Benbanah, even Hible-Ziwa, the creator of the Earth. Mani, ye are also Benbanah, for in this life ye are the son of the Parthian kings, even Artabana, therefore ye are "Son of Bana" which is the meaning of Benbanah, and Bana meaneth "House of Light". Mani, I am thy Syzegos, so we are the same being. We are the framer, and savior of the world, the Isa of Light, for we were Isa. We are the soul of all the worlds; the first and last."

12. Now Mani's Syzegos showed unto him a vision, and revealed unto him the mystery of the "Two Principles" and of the "Three Moments." And he explained them thus, "The two principles, are the principles of light and darkness. Iuh and light particles are of the light realm, while dark particles or darkness, which is matter, is of the dark realm. The two principles, light and darkness, were mixed together at the creation of the Universe by Hayyi."

13. "The three moments, are (one,) the moment before the Universe was created when the light realm was an infinite ocean of Iuh and light particles, bound together like a perfect lattus or web; each Iuh a jewel, and the light particles like strings connecting them. This ocean web, of pure consciousness is all knowing, perfect in unity."

14. "(Two,) the moment that the Universe endures for hundreds of Billions of years in which Iah and light particles are mixed with elements of darkness, from which they all will eventually be saved. (Three,) the moment after the Universe, when there will again be a perfect web, or lattus like, ocean of light, and life; save that we will have gained form, and knowledge, to make new and unique worlds of total light, and plains of new creations. — While the realm of matter will return to unmanifest matter, which is just an abyss of bubbling darkness and void."

15. "Verily, verily, this is all ye need know, to spread the truth from the western most ocean unto the eastern most ocean; but I shall also reveal unto thee many wonderful mysteries and histories, and stories of the Uthra, which shall be in the book of Mar-Mani, or "Momoni."

16. After this Mani taught the Elkasaites that they need not bless their food, because the nature of light particles and dark particles are Eternal and unchanging. The Elkasaites excommunicated him. Mani taught a wild hairy man who believed him. Patik, Mani, and Adai his friend went to go get a license to preach from Ardashir, but got one from his son Shapur instead. Mani made many beautiful texts and converted scribes to copy them. Mani travelled into the east calling himself the "Dr. from Babylon." Mani taught the King of Barygaza India, the Rajah, an exercise based upon the six different kinds of light particles. Mani travelled in the land of Babylon again, but was summoned by the wicked King of the Sassanian Persians, Vahram I, and questioned. The wicked Zoroastrian priest Kirdir sentenced Mani to torture and death [on February 2nd, 276 A.D.]. They skinned him, and put his skin on the castle wall.

17. This date is the feast of the "Bema," which is a stand upon which the Elect put vegetables in remembrance of the light particles incarcerated in matter, and all the male Iuh experiencing the trials of this world.

18. When Gabriel revealed Al-Fatihah to the prophet Muhammad (Bless him.), he said another Angel will come down and reveal it, who is Mani. Mani said that the mystery of Al-Fatihah, is that Hayyi, the Lord of all the worlds is the Most merciful, and the Most compassionate, meaning that he loves you 100,000 times more than your own mother, yea, he loves you infinitely!

19. Mu'aiya was the true heir of Muhammad (Bless him.) for he made the patro on the Temple mount in Al-Cuds, and reared a Temple there as a beacon on a hill, and let Jews, Christians, and Muslims worship together in a Temple rite of anointing and burning incense. Mu'aiya's son Yezid saw his Syzegos who is Aspien, fought the heirs and burned Mecca, and from him the Yezidis are descended. The Mandaean descend from Elkasaites and Manichaeans who kept the record of how to baptize from John the Baptist and his daughter Meryay. The knights of the crystal blade descend from Joseph Smith who is Adadonius. The master is the son of his slave girl, and the end is come.
