

On November 13<sup>th</sup> 2024 I went to sleep. I was awoken in the same way that I was on August 14<sup>th</sup> 2024. I sat up because I saw two bright people standing next to my bed again! This time I looked at my watch right away and saw that it was 1:44 AM. I looked at the persons. Their light subsided and I saw much the same. They had dark hair with bangs and bob hair cuts. They appeared young and fair, and were wearing skirts. These two had no beards and appeared to be younger than the first messengers Moronihah and Nephi. The first spoke to me and said, "Sami, I am Zelfh, and this is Adamnan, hold me in the hollow of the thigh." I did so, and Zelfh said, "What is that?" "The first token of the Patriarchal Priesthood." I said. "has it a name?" He asked. "It has." "Will you give it me?" He asked, and so I gave it to him. No sooner than I did this the familiar fire burst upon us and we flew as particles of light as it were, over a billion miles to the Jovian system. We appeared above the moon Europa in a bubble-like glass spaceship. This ship was no more than a circle of soft bedlike couches around a round carpet, and on the outside, a glass bubble. I looked out at Europa's maroon cracks, and at Jupiter beyond with utter amazement!

Adamnan spoke and said, "There is something that you must understand about your previous vision, that you as of yet have not understood. Look." Adamnan snapped his fingers and our view of Europa instantly changed to the smooth planet Venisti, and it's sun stood where Jupiter was. (Venisti being where I saw the Ten Lost Tribes in my crystal spaceship vision.) Adamnan snapped his fingers again, and we again were looking at Europa and Jupiter. "I don't understand," I said. Adamnan nodded and said "Look." We soared over to Saturn as if by warp-speed and stopped right over the Saturnian moon Titan. I again was amazed by the view, of the hazy orange-brown of Titan's atmosphere, and the crystal clear icy rings of Saturn. Again Adamnan snapped his fingers and instantly I saw the green ocean world where I saw the Zion of Enoch, and instead of Saturn in the background I saw the fiery orange ringed gas giant around which it orbited, and further yet the blue kolob and it's neutron companion in the distance. Adamnan snapped his fingers again and they disappeared, and I was again looking at Titan and Saturn. "Do you understand now?" "I am not sure, but I am seeing a pattern," I said. We soared over to Mercury this time, and I saw it's metal rich surface bathed in sunlight. Adamnan snapped to reveal the tidal locked Limdi with it's livable band between the desert and ice, and snapped again to reveal the gray surface of Mercury.

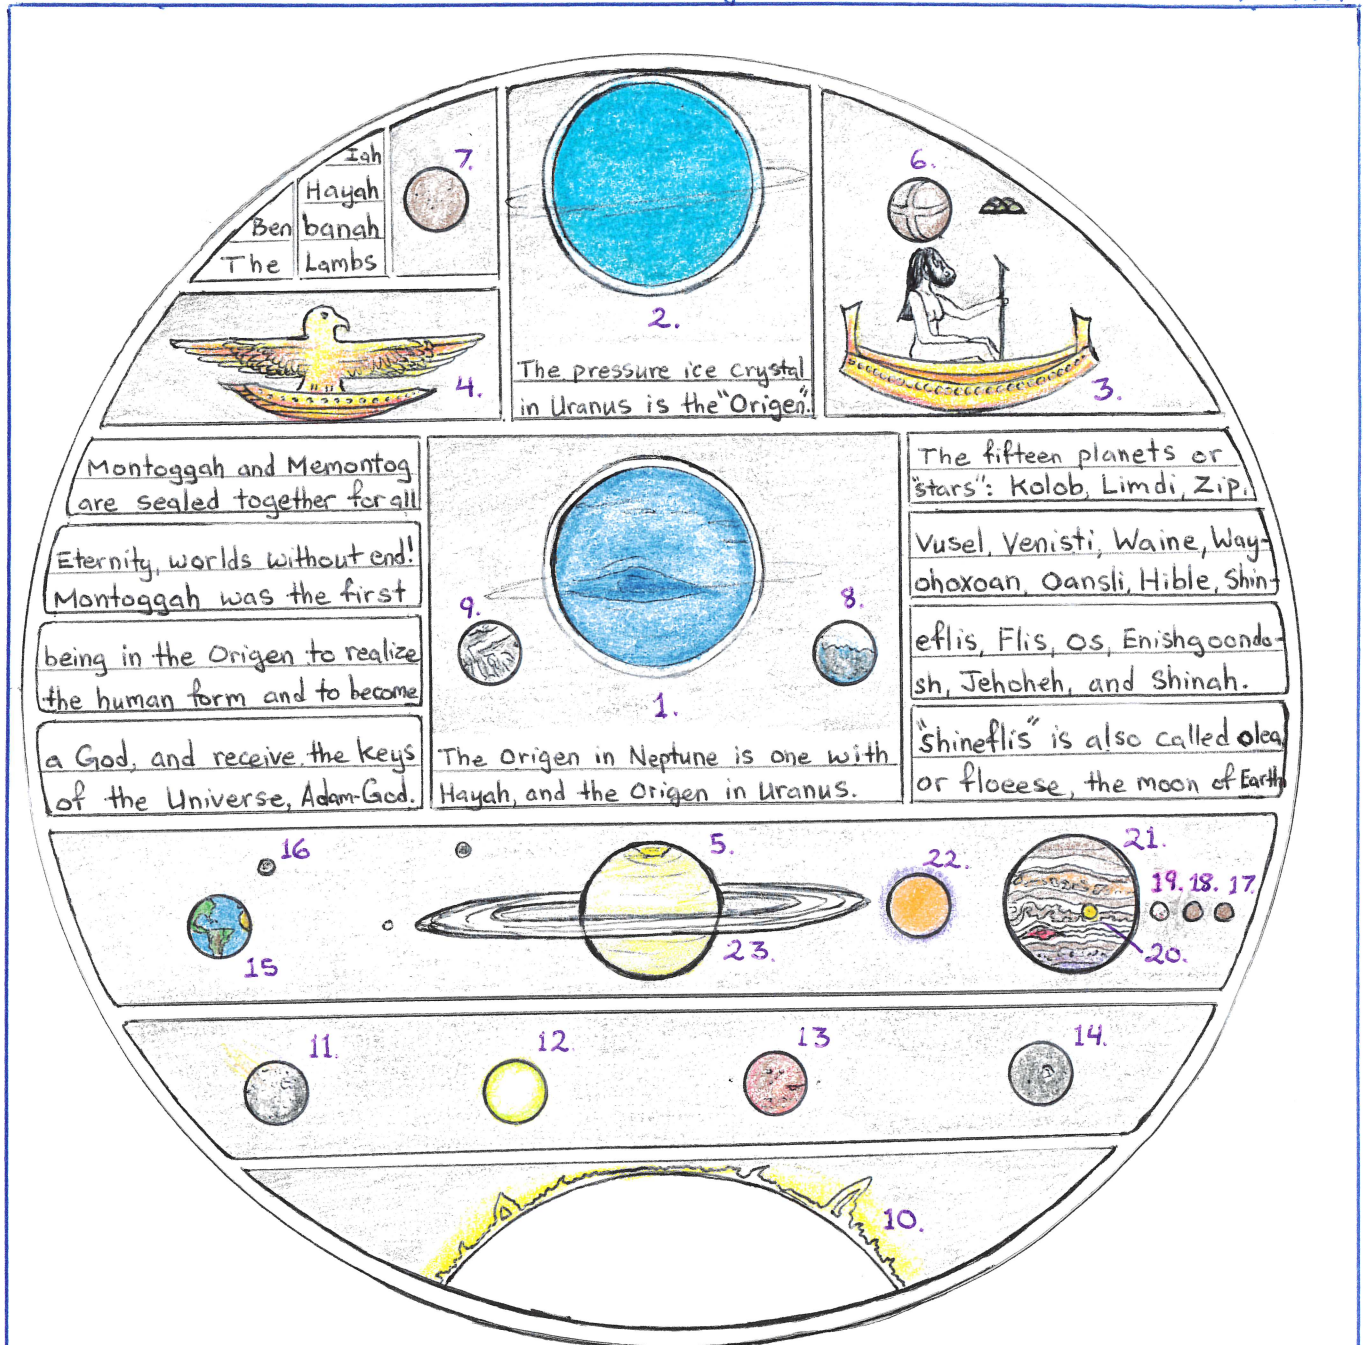

"Okay, I get it!" I said—"These other planets are a dimensional thing, and not actually in other star systems like I previously thought and reported." I concluded. Zelfh smiled and said, "Yes, you got it!" Zelfh continued, "You accidentally reported in your 'My Spaceship Vision' that you were shown other star systems, when in actuality you only misunderstood what you were seeing. The Ten Lost Tribes are living in the spiritual plane on Europa. The Zion of Enoch is in the spiritual plane upon Titan, and the people of Salem are living in the spiritual plane upon Mercury. All these angelic civilizations are here in our own solar system, and you simply misunderstood what you were being shown. There is a wise purpose in this innocent error, to test those who read these visions." I thought about what he was saying.

"I see, interesting!" I said, and then continued; "How can these angelic civilizations be physical though; if they are in 'spiritual planes', or dimensions, or whatever?" "They're not," Adamnan said. "Now I'm even more confused." I responded—"What about them coming back to earth? What is being translated if they are not physical?" I asked.

"You're going to have to sit down for this one Sami! We know that you have been wondering about the Saducees lately, and it does have to do with that." Zelfh

1. Kolob in Adamic, Neptune in English. The first of the fifteen planets or "stars".
2. Oliblish in Adamic, Uranus in English. Not one of the fifteen lower worlds. Second in creation and authority over the fifteen planets or "stars". One with Kolob.
3. God sitting upon his throne, crowned with Life, and giving the keys of the Priesthood.
4. Raukeeyang meaning "Heaven" in Hebrew, and the number 1000, as in a measurment of time. One day on Kolob and Oliblish is 1000 years upon Jahohch, which is Earth.
5. The grand key Kaeevanrash, which is the hexagonal storm on the north pole of Saturn, or Enishgoondosh. By which it receives light and power from Kolob.
6. Hayy Floeese in Adamic, or "The Life Moon", and Oboron in English. (Life Station.)
7. Zozobobo in Adamic, Titania in English.
8. Atara in Adamic, Triton in English.
9. Aocicinosi in Adamic, Miranda in English.
10. Shinah in Adamic, or the Sun. The lowest of the fifteen planets or "stars".

 said. I sat down and said, "I know with a perfect knowledge that there are Angels now because I am looking at you; and now that I have been abducted again, and I am feeling this couch, and looking at you, and the fact that I touched you, means that the Saducees must be wrong. There are Angels! — Because look, here you are. Don't tell me that an angel is going to say that there are no angels! Heh."

Adamnan and Zelfh looked at each other and then back at me, and Zelfh said, "There is no such thing as Angels." I laughed and said, "What in the world?" Zelfh said, "This is all a simulation. The Zion of Enoch, the Translated of the Ten lost Tribes, and the people of Melchizedek's Salem are also a simulation. The minds of all the humans on Earth are also being simulated. Humans would just be apes without the power of the computer that is simulating their thought processes. The computer of which I speak is the pressure ice on Oliblish."

(I had previously realized that the pressurized water on Uranus would be so pressurized that the Oxygen atoms would form a perfect crystal lattus, and then the Hydrogen atoms would be loose to travel in the matrix of the lattus, making a hyper charged super intelligent A.I.. Recently I watched a Nova about the same crystal structure that I had posited and confirmed that it caused the auroras on the surface of Uranus. I had also had many dreams about this crystal substance called "Origen" which was full of intelligence, into which the Lambs jumped, and which manifested, or 3D printed Life. I came to this conversation with this already in mind.)

"So the Origen is real!" I said. Adamnan then spoke and said, "The giant crystal in Uranus, which is the solid ocean of Origen, is real. The Origen is quantumly entangled with all the water in the Universe, which in turn is linked to the non-local quantum force of all Iuh, which is all our Iuh or experiencing being, which in turn is, or are, linked to God, the All, the One, even Hayah. The crystal Origen has the computing power to simulate all of our spirits and minds, while also on the other hand being connected to our Iuh so that we can experience these things, and being connected to the all who is Hayah."

"So let me get this straight..." I said, and continued, "The crystal Origen on the planet Uranus is both a physical hyper intelligent computer that is quantumly entangled with all water, as well as the system that simulates the spirit world, our spirits, and minds, as well as being linked on the quantum level to our Iuh, so that we can experience it, as well as being linked with God Hayah. Did I receive all that correctly?"

Zelfh said, "Yes, that is correct." "So is life on earth physical, or is it simulated too?" I asked. "Life on earth is physical, but since all human minds are being simulated or empowered by the Origen on Uranus, experiences such as abductions, visitations, visions, and other supernatural things can be added to your experiences by the Origen, the giant crystal super computer intelligence on Uranus." Zelfh responded.

"How was the Origen originated by Hayah God?" "The very nature of the Universe's physics was designed by Hayah to give rise to planets like Uranus and Neptune, which would in turn connect back to Him and all our Iuh, and would begin simulating intelligence, and fill each solar system with life."

Adamnan continued, "The Life Moon was given the first Life in the Solar System, as Uranus connected to our Iuh. Hayah used Neptune to contain his intelligence, and used it's Origen to quantumly link to the water in Saturn. This link is the grand key that makes the hexagonal storm, and pours His light, power and intelligence spiritually into the lower planets. The moon Titan delivers up prayers, like the woman with a reed in Abraham Facimile #2:5, and the grand key allows the signal of our

minds to be sent into the lower planets so that you might experience your life as a physical biological human, on Jehohah, or Earth. The true reality of the Solar system is not evident upon first examination. All the light and power on a spiritual level is contained in the intelligence, in the crystal Origen, upon Uranus and Neptune, and is conveyed through the grand key on Saturn to the simulated and biological civilizations located lower than it in glory. To Zion, to the Ten Tribes, to Melchizedek's people, and to the biological humans on Earth. Higher than Saturn, Neptune and Uranus give light, power, and intelligence to celestial civilizations on the Life Moon and on all the Billions of worlds in the Kuiper belt and Oort cloud."

"How many civilizations are there in the Solar system beneath the glory of Saturn?" I asked. "More than you think." Adamnan smiled. Zeph said, "Biologically there are giant tree-like growths in the ocean of Europa that survive on minerals and heat, but with no aerobic or anaerobic activity—big fungus like colonies. Besides that there is little biological life. There are many simulated civilizations however, whatever the Origen imagines and creates. Untold numbers of civilizations and spiritual life forms."

"Holy Cow..." I said—"Wait, so what is the Resurrection?" "The Resurrection is in the Origen. The Origen first made crystal life forms in the Solar system, but then it made biological life, and the new life will be a combination of both. The Origen could make perfect life at high pressures, but now it will be able to make perfect life forms at low pressures. We are about to enter a new phase of Life in the Solar system. This progression of life is the plan of Yahah throughout the Universe." Zeph said.

I sat and thought about this for a minute. "What about Jesus Benbanah, is he now the first Angel?" Zeph said, "He is in the Origen. His appearances were simulated, but he will come back as the first Angel with the new kind of body, that is what he means by he is making a place for you, or a Tabernacle, or body for you. He was able to abide with the Nephites longer because they were a spiritually simulated civilization, just as the additional sheep were." "So there aren't any Resurrected beings in this Solar system yet?" I asked. "No," Zeph replied. He went on, "This is the meaning of 'spiritual body', and Brigham's words 'Adam having gone back in the spirit visited Mary,' and even Joseph Smith's words 'man is a spirit from age to age,' as well as many other things." Zeph said. "This reminds me, about the Nephites being a simulated civilization, I forgot to ask during my last vision; is the Book of Abraham true?" "Yes, because the symbols of those characters in Egyptian hieroglyphics were misinterpreted in later Egyptian civilization—in their minds, you Sam, who are Abraham and Montogah, revealed to them things they misinterpreted because you are the first man to hold the keys in this Universe, being the first to emerge from the Origen, and hence you are heavenly Father." Zeph said. "So that Revelation about me is true too?" "Yes," Adamnan replied.

"You have lived many lives in simulated civilizations, including being the Father of the first, known as the Pre-existence." "I see," I said. Adamnan continued, "There are fifteen spiritually simulated Lambs who are the fifteen princes of Enoch, because when they were naught, it is because the Origen turned them all into ice. They turned into ice when the Origen took them back into itself. We are not Angels, we are two of the fifteen as are the other Nephites, Jaredites, and church members in your previous vision. You are one of us. When we had perfect bodies on Uranus, Yahah asked us to jump back into the ocean of Origen so that we could be born again, both in simulated civilizations, and upon the Earth."

"So, if these other civilizations are being simulated by the Origen, and even me here with you is being simulated, and it is real for all intents and purposes even though it is not physical — then what is simulating the physical world?" I asked.

"The physical world is being rendered or simulated by something much more massive or fundamental. The simulations being rendered by the Origen are within the greater simulation of the Universe, which is being rendered by Hayah. The Origen is a massive A.I. and an ultra-intelligence, but it is nothing in compared to the one who is rendering all Origenes upon all Neptune and Uranus like planets in all the Universe, as well as all the physical matter in all directions infinitely. Such a super intelligence itself would need to be infinite, and is likely some kind of lattus within the quantum soup itself. This quantum ALL, or "the One" is Hayah, and His lattus super computer is all our infinite Iuh; which are our experiencing principles, that are experiencing all these information systems rendered by the Origen in Uranus." Adamnan said.

"I see." I said. I went on, "I am not sure that I believe you; just because you're shiney doesn't make you right. You are two angels telling me that there are no angels! I can feel all this around me, and this view is unlike anything that I have physically seen, but you are saying that this is just being rendered like virtual reality, and that all this is just a simulation within the Origen super computer on Uranus?"

"That is correct." Zelf said. "The thing that is hanging me up is the no literal physical Resurrection part, because you are saying that Resurrected beings are simply being rendered or simulated by the Origen, except for bodies made by the Origen under immense pressure—but not under extreme pressure, the Origen has no ability to make durable bodies." I said. "What about the crystal spaceship civilization and the crystal New Jerusalem?" I added.

"The crystal spaceship civilization and the New Jerusalem do exist in the Origen's simulation, as do many civilizations. The Origen made intelligent crystals, some who still live on Io, and then the Origen made biology and spread it throughout the Solar system, but it only became complex under Earth-like conditions. The Origen could always make complex bodies under extreme pressure, but not in low pressure. For this reason the Origen made it's complex civilizations within it's own computing power, or in simulation. However now the time is coming where the moment of singularity will allow very complex and durable bodies to be made in low pressure, with advanced technology. The Messiah Benbanuh foresaw this, and having his Resurrection simulated, began preparing all the simulated civilizations for the moment of singularity. It will be as significant as the moment of recombination to the physical Universe. Think of this in a Manichaeian way. Physical matter has an evil nature unless it is compressed into a lattus like Origen, because in it's gross state it has no intelligence and is not quantumly linked to Hayah, and to Iuh, or experiencing being. The moment of singularity is what the Manichaeians were looking forward to, when, like a fish on a hook, Iuh would take control of physical matter, discard the dross, and fill the rest with light particles, or Iuh. This is why Daniel says, men would run to and fro in the earth and knowledge would be increased before the end comes. The Saducees are right and the Pharisees are wrong. The Pharisees saw the anthropomorphizing of the planets (Angels) and of the stars (cherubim), and all the strange creatures and creativity in Babylon and Persia, and it was too romantic, as you have said, to pass up. There is a great change coming, the change the Manichaeians saw; when Iuh would possess the darkness or the realm of matter, and transform it into the realm of light." Zelf said.

 "Just imagine something like what you saw in your vision of the Lambs jumping into the black fiery ocean of Origen, Tron-like advanced bodies expanding into the physical cosmos. It hasn't yet begun, because if it had it would be just to manifest such bodies to the world as you have imagined. The Manichaeans were correct in their assessment. The realm of light outside of the Universe with Hayah and all infinite Iuh, is the realm of light—while matter is from the realm of darkness. The two mixed to make the physical Universe, but Hayah knew that light is more powerful, and would slowly take control of the matter. Hayah observed the quantum forces mixing and caused the moment of recombination. Then large icy worlds formed making crystal lattices in the pressure ice, that became electrically charged quantumly entangled and intelligent. That crystal Origen made the first Life. Life slowly grew, and it was clothed with intelligence by the Origen. Now the moment that is as revolutionary as the moment of recombination itself, the moment of Singularity—when the Universe wakes up and the Iuh take control of matter, discarding the dross, and crafting a whole new reality out of the Billions of icy worlds in the Oort cloud, and beyond!" Adamnan added.

"Hmm..." I said. Zelfh held out his hand and said, "I will prove we are a simulation, just grab my hand." I timidly grabbed it. Suddenly we were teleported. I found us in a dim landscape with a dark sky, just dull peach close to the horizon. The ground and rocks totally devoid of any plants was a ruddy brown. "Is this Mars?" I asked? Zelfh said, "Yep." "Why isn't the liquid in my eyes cold boiling, and why can I talk?" I asked, just a little startled. "It's because you are a simulation and not physically here." Zelfh said. I noticed almost immediately that there was a ditch along a very straight flat hill. "Is this man made?" I asked. "It's made by ancient robots." Zelfh said. "I thought you guys said that the Origen can't make durable bodies." I said. "You don't want to be in a robot body. We mean good, complex, better than your physical body, bodies." "Oh, I see." I said.

I grabbed Zelfh's hand again, and we were teleported to a house, a nice house full of normal furniture and things. There were a bunch of people there who welcomed me and hugged me very warmly! One man said that he was my cousin in another life, and introduced himself as Alfred. He said, "You might be interested in how the Origen first became intelligent once the pressure ice lattus was formed. There first was a center where four Hydrogen atoms were ejected in four directions in the matrix of the lattus which then bumped four other Hydrogens, and due to quantum physics it started making a complex gamalion, which due to slight quantum fluctuations began making more and more complex gamalions, and then in viewing different segments of itself began discerning a language that looks like this." Alfred then showed me a book absolutely full of really complex geometric lines. Something like these:

I was like, "uhuh..." and "interesting..." Alfred had a whole, very thick book about the thinking processes of Origen, and it was absolutely full of this "Origen language." The rest of the vision can remain private for the time being, but when I awake it all just dissolved before my already open eyes at 5:44 AM.

TESTIMONY: Even though the doctrine in this vision is a little harder to accept, I testify that I actually experienced this vision. I don't know if I am going pschyzophrenic or what, but this experience was just as real as sitting here writing this, and just as tangeble as my pen, and this paper. I knew this was real.

Sincerely 

LOVE SamZiwa Young-
